

URGENT PRAYER REQUEST

October 19, 2026

Rachel just sent this VERY important information:

This is regarding the renewal of our FCRA registration, which is due this year. FCRA is the Foreign Contribution Regulation Act (FCRA), this is the Indian Law that regulates the money received from foreign sources. It basically decides who can receive foreign donations, how they can use them, and what records are to be maintained in respect of donations received. Prakash, Vet Med and CBCA all have their own separate registrations under this law, through which we are able to receive and utilize the funds sent by PAUSA in a legal manner.

To us, it is our main source of funding, so without the FCRA we won't be able to carry on with even our basic activities. It is essential not only for the students and transformation of their lives but also for the staff as it puts food on their tables by way of salary. So, the lives of the students, the staff and their families all depend heavily on the approval of this renewal.

From what we have heard from others who have gone through this process before us, we understand that there may be many challenges along the way, including surprise visits and inspections by concerned officials.

In some cases, they have gone as far as to ask for original paper documents dating back to 10 to 15 years ago, along with other unexpected requirements. The uncertainty of not knowing what documents may be required, what questions may be asked, or what challenges we might face during the process and inspections makes it really overwhelming.

That's why we need your prayers during this time. This renewal is extremely important to us, and we are trusting God to guide us, provide everything that is needed, and help us through every challenge. Please

keep us in your prayers, that God will grant us wisdom, favor and a successful renewal for the advancement of His work.

Thank you again for your prayers and continued donations
