

NLC Church Chat Messaging and Groups

We now have the ability to direct message church members and staff from either our mobile app or website (www.NLCBorger.com) In addition we can have chat threads, share photos files and more. It is our own social media much like Facebook safely housed in our dedicated cloud server. (just a fancy way of saying if you aren't a part of the NLC Borger Church family it can't be seen - no ads, no oversight by government or corporate censors.) For the techies among you, we move our cloud on a weekly basis using block chain encryption. These servers are internationally located (currently we are in Ireland) although most often in the EU which has much more stringent privacy requirements.

Within the messaging system we also have the ability to create small groups of all kinds. Bible studies, special projects, ministry outreach, and special Interest groups (all the Fishermen for example can swap stories, help with Danny's Children's Fishing Outreach or plan joint outings with each other, the quilters and so on) and our youth groups. (They can learn safety and discernment in a well supervised environment)

Our pastoral and administrative teams can also communicate with you with critical information, special announcements, updates. This ability alone will save hours of time (and lots of \$\$\$) allowing more time and resources for PEOPLE

To access all this you must have an account. There are 2 ways to create an account:

1. The easiest is to create an online giving account. Click on **"GIVE"** on the website or follow this link <https://www.nlcborger.com/give> And simply follow the prompts. There is a tutorial on the left side of the page. You need not be a regular online giver, but having the ability is helpful to you for special offerings, or online registration for events and such.
2. The other option is to click of the chat icon in the lower right corner of the

website: If you have an account already you need nothing more. If you don't have an account click on "CONVERSATIONS" and you will be prompted to create one. Just fill in the information, create a password and you are good to go. Well almost. You will receive a confirmation email asking you to confirm your email Once you do so you are IN.
