Upcoming Dates

- No School September 7th in observance of labor Day

Looking ahead

- October 15th will be our schoolwide field trip to Willis Farm

In the first two weeks of school the 2nd graders have worked on addition math problems as well as beginning cursive and reviewing vowel sounds. We also are working on our reading skills using phonics. The 3rd graders have been learning about the different types of sentence, punctuation, and using proof reader marks. They are reviewing their cursive letter formation, and how to regroup numbers in subtraction problems.

Miss Angela

Our 4th and 5th graders have had a wonderful first two weeks of school! We have been learning new routines, building friendships, and working hard in all our subjects. I'm proud of how well the students are settling in and look forward to a great year together!

Mrs. Cospers

The first two weeks of school have been very fun. The first graders have been doing a lot of review from last year, and I am pleased to say they remember all the material we have covered so far. The kindergartners are starting to figure the whole school thing out. They are learning vowels and numbers 1-7 right now. I am hopeful these students will learn many new things in the weeks to come.

Miss Natalee
