

Bible Translation Workshop

During the month of June, I conducted a week of translation workshop for the Asho Chin project. We were able to cover John Chapters 8 through 12. The quality of the translation has improved a lot, and the team is functioning much better. Quite a number of changes we made had to do with omission of words or phrases.

Church Building Dedication

Our church planter, Pastor Aung San, has been doing very well in Kholam, Shan State. It became necessary for the church to have a building since their place was too small for them. The Lord provided them with a parcel of land through some of his church members, and our church helped them with the building. One of our associates and two deacons went there for the building dedication during the month of June.

Odd-Even-Numbered Plates!

Imagine being able to use your vehicle only every other day, and you are given only 40 liters (10.5 gallons) of gas a week! That is exactly what we are dealing with here in Myanmar. It was okay until the kids resumed

their school, and the Bible school started in June. We pray that this law would be done away with soon.

Family Front

During the month of May, we traveled to Taunggyi for a family reunion. After several years, Hung and his four siblings were able to get together. Praise the Lord for giving us a wonderful time of sweet fellowship with one another, and also for allowing us to celebrate the 50th anniversary of Hung's oldest sister and her husband.

During the second week of July, Rebekah, our second daughter was suffering from dengue fever and was hospitalized for three days. Praise the Lord, she is doing well now!

Thank you so much for praying for us and supporting us so faithfully.

Lord bless,
Hung, Priscilla, Rachel, Rebekah, Samuel, Ruth,
and Stephen
