

Geological Evidence for a Global Flood

Where were you standing when the fountains of the deep broke open and the earth fundamentally changed? Wait, you mean to say you are not antediluvian? You mean to say that YOU were not there on that day? Well, I guess that is true, and correct. Guess what? Neither were any of the secular scientists, or atheists that claim that Noah's flood did not happen, or was just a "local" flood. That is bad news for them, because they have no authority on which to base their false claims, and frustrating to the world because they have deceived many with their falsehoods.

Worldwide Flood, Worldwide Evidence

When the Bible refers to a Global Flood in Genesis 7–8, that's exactly what it means. Not local, not metaphorical, not some crazy dream—the waters covered the whole earth. Every air breathing creature, human and animal, that was not safe on the ark, died. Because of the global upheaval there is much evidence that a lot of sea animals died too. The account found in Parashot Noach is true. Observable scientific facts actually support a global flood, and the evidence is everywhere. Let's look at a few provable examples:

High & Dry Sea Creatures - Remnants of sea creatures high above sea level

We find fossils of sea creatures in rock layers that cover all the continents due to the ocean waters having flooded over even the highest points on every continent. For example, most of the rock layers in the walls of Grand Canyon (more than a mile above sea level) contain marine fossils. Fossilized shellfish are even found in the Himalayas; the tallest mountains on earth!

The Whole Earth is a Graveyard - Rapid burial of plants and animals

When an animal dies in the wild, it decomposes, often the remains are consumed by carrion eaters like vultures, lobsters, coyotes, wild pigs, and shrimp. Beetles and worms break the carcass down even further and after a little while we find nearly nothing left of it at all. However, anyone can find extensive fossil "graveyards" and exquisitely preserved animals whose bodies must have been buried, and thus protected from rapid decomposition, very quickly. For example, billions of nautiloid fossils are found in a layer within the Redwall Limestone of Grand Canyon. This layer was deposited catastrophically by a massive flow of sediment (mostly lime sand). The chalk and coal beds of Europe and the United States, and the fish, ichthyosaurs, insects, and evidence of large animals all around the world, testify of rapid catastrophic destruction and burial. Like the song says: Billions of dead things, Buried in rock layers, Laid down by water, All over the earth!

Affirming Truth in Parasha Noach

Transcontinental Rock Layers -Rapidly deposited sediment layers spread across the earth

We find rock layers that can be traced all the way across continents—even between continents—and physical features in those strata indicate they were deposited rapidly. For example, the Tapeats Sandstone and Redwall Limestone of Grand Canyon can be traced across the entire United States, up into Canada, and even across the Atlantic Ocean to England. The chalk beds of England (the white cliffs of Dover) can be traced across Europe into the Middle East and are also found in the Midwest of the United States and in Western Australia. Inclined (sloping) layers within the Coconino Sandstone of Grand Canyon are testimony to 10,000 cubic miles of sand being deposited by huge water currents within days.

Sand Transported Globally - Sediment transported vast distances

We find that the sediments in those widespread, rapidly deposited rock layers had to be eroded from distant sources and carried long distances by fast-moving water. For example, the sand for the Coconino Sandstone of Grand Canyon (Arizona) had to be eroded and transported from the northern portion of what is now the United States and Canada. Furthermore, water current indicators (such as ripple marks) preserved in rock layers show that for “300 million years” water currents were consistently flowing from northeast to southwest across all of North and South America. This, of course, is only possible over weeks during a global Flood.

No Slow and Gradual Erosion -Rapid or no erosion between strata

We find evidence of rapid erosion, or even of no erosion, between rock layers. Flat, knife-edge boundaries between rock layers indicate continuous deposition of one layer after another, with no time for erosion. For example, there is no evidence of any “missing” millions of years (of erosion) in the flat boundary between two well-known layers of Grand Canyon—the Coconino Sandstone and the Hermit Formation. Another impressive example of flat boundaries at Grand Canyon is the Redwall Limestone and the strata beneath it.

Folded Rock Layers -Many strata laid down in rapid succession

Rocks do not normally bend; they break because they are hard and brittle. But in many places we find whole sequences of strata that were bent without fracturing, indicating that all the rock layers were rapidly deposited and folded while still wet and pliable before final hardening. For example, the Tapeats Sandstone in Grand Canyon is folded at a right angle (90°) without evidence of breaking. Yet this folding could only have occurred after the rest of the layers had been deposited, supposedly over “480 million years,” while the Tapeats Sandstone remained wet and pliable.

What now?

The Bible's history is reliable throughout—from Bereshit to Revelation, and it exists as testament and a tool to bring us into relationship with Yeshua. But just reading the evidence isn't enough. The message of salvation is found throughout Torah. Remember that evidence for the Global flood is undeniable, but the fact that our loving G-D made a way through that catastrophe for those that trusted HIM, is also undeniably true. There was room on the ark for all of humanity and the animals, no one but those in Noach's family accepted HIS invitation. Remember that just like Noach, HE has made a way of salvation for us. G-D wants us to accept the gift of salvation He freely offers us. The evidence is real. G-D has revealed Himself to us in His Word and in His creation (Romans 1:20). How will we respond?

Billions of Dead Things

<https://youtu.be/mMnY6UFedGO>

by Buddy Davis

[Verse 1]
The Bible talks about a worldwide Flood,
Of a worldwide Flood,
Of a worldwide Flood,
If there really was a worldwide Flood,
What would the evidence be?

[Chorus]
Billions of dead things,
Buried in rock layers,
Laid down by water,
All over the earth!
Billions of dead things,
Buried in rock layers,
Laid down by water,
All over the earth!

Well, there really was a worldwide Flood,
Just look at the stony curse.
With billions of dead things
Buried in rock layers
Laid down by water
All over the earth!

[Verse 2]
The Bible talks about Noah and the Ark,
And a worldwide Flood,
Where the world was judged.
If there really was a worldwide Flood,
What would the evidence be?

[Chorus]
Billions of dead things,
Buried in rock layers,
Laid down by water,
All over the earth!
Billions of dead things,
Buried in rock layers,
Laid down by water,
All over the earth!

Well, there really was a worldwide Flood,
Just look at the stony curse.
With billions of dead things
Buried in rock layers
Laid down by water
All over the earth!

[Verse 3]
The Bible talks about a worldwide Flood.
Could the fossils be
The proof we see?
If there really was a worldwide Flood,
What would the evidence be?

[Chorus]
Billions of dead things,
Buried in rock layers,
Laid down by water,
All over the earth!
Billions of dead things,
Buried in rock layers,
Laid down by water,
All over the earth!

Well, there really was a worldwide Flood,
Just look at the stony curse.
With billions of dead things
Buried in rock layers
Laid down by water
All over the earth!
