

Fisher's of Men (page 1 of 2)

Directions: This page of the craft contains a boat and a sail. You will need another piece of blue construction paper to glue the boat to. Have the student color the boat and the sail before cutting out the shapes. Use a hole punch to punch the holes for the sail. Use a drinking straw for the mast. Glue the straw in the middle of the boat, then thread the mast onto it.

(Glue on back side)

Fisher's of Men (page 2 of 2)

Directions: Have the student color in the pictures, then cut them out, cutting along the dotted line. Paste the disciples into the boat craft from page 1 of this craft. Paste Jesus outside of the boat.

Items Needed: Craft sheets, glue stick, cardstock, scissors, and crayons. A glue gun would be helpful for the straw to be pasted into the boat. This is an item that is not recommended to be used by the students. Otherwise, white glue can be used in place of a glue gun. Black yarn can be used to make some additional fishing net in front of the boat if desired.
