

UNIVERSITY OF KENTUCKY RESEARCH

Want to know if you are exposed to RADON in your home?

Researchers at the University of Kentucky are conducting a research study to learn more about how environmental conditions affect radon levels inside homes. Participants are invited to take a brief survey and test their home for radon. In addition, participants will help promote a radon detector kit library loan program and work with others to encourage radon testing and mitigation in their community.

You may be eligible to participate if you:

- Live in Christian County, Kentucky
- Are age 21 or older and own your home
- Are not planning to move in the next 1 year
- Are willing to test your home for radon
- Have access to a mobile smart phone
- Have ready access to the internet
- Are able to read and speak English

Research participants will be compensated for taking part in the study.
