

Master Builder Christian International University

Master Builder Christian International University's mission is to support church-based theological education by providing academic degree programs for church ministry. Launched in 2023, this is an immense work that is continuing to grow. It started as an endeavor to assist in the training and education of Portuguese-speaking pastors and a long-standing vision to train Christian leaders "from neighborhoods to nations." This vision is now realized in MBCIU. Our hope is that we are establishing the foundational groundwork for extending the Kingdom of God by giving leaders the tools needed to be able to commit to other faithful men and women what they have received.

Below are some needs for the continued establishment of MBCIU, and opportunities to assist both the university and its students . Your support of any kind can help pave the way for this great work to grow and continue forward.

Technology
